in Nitra

Content

- ▶ Dissemination in general
- ▶ Dissemination in the ECAP project
- ▶ Dissemination tools in the ECAP project
- ▶ Publicity - EACEA requirements
- ▶ Dissemination and Exploitation Plan

Dissemination in general

- ▶ ec.europa.eu:
 - **dissemination** - a planned process of providing information on the results of programmes and initiatives to key actors;
 - occurs as and when the result of programmes and initiatives become available;
 - Erasmus+ Programme - dissemination involves spreading the word about the project successes and outcomes as far as possible;
 - impact on other organisations in the future and will contribute to raising the profile of the organisation carrying out the project

Dissemination in general

- ▶ ec.europa.eu:
 - effective dissemination of results - an appropriate process at the beginning of the project needs to be designed;
 - why, what, how, when, to whom and where disseminating results will take place, both during and after the funding period;
 - **exploitation** - distinct but closely related to one another;
 - a) a planned process of transferring the successful results of the programmes and initiatives to appropriate decision-makers in regulated local, regional, national or European systems,
 - b) a planned process of convincing individual end-users to adopt and/or apply the results of programmes and initiatives.

Dissemination in the ECAP project

- ▶ dissemination and exploitation strategy must be reliably explained in the project proposal;
- ▶ in ECAP project - Part G.2. Dissemination and exploitation strategy;
- ▶ project dissemination tools - to promote project and its outputs and to spread project ideas among people;
- ▶ addressing target groups - teachers, experts, students and generally to wide public;
- ▶ using dissemination channels with the easiest access - internet, press and media, this all supported by organizing various events;
- ▶ dissemination tools - project logo, web site, printed leaflet and newsletters in partnership languages.

Dissemination in the ECAP project

- ▶ supporting events - information seminars and meetings;
- ▶ social network - additional tool for project promotion;
- ▶ **main activities of the dissemination strategy:**
 - web page creation,
 - electronic platform with an access on the Virtual Learning Environment (LMS Moodle),
 - project logo production,
 - production of leaflet, newsletters and poster,
 - project promotion in journals, newspapers,
 - events organization - information seminars, workshops, participation on conferences.

Welcome to the website of the ECAP project

ECAP is an Erasmus+ KA2 Capacity Building in Higher Education project No. 561590-EPP-1-2015-1-SK-EPPKA2-CBHE-JP implemented in the consortium with partners from Slovakia, Austria, Czech Republic, Kazakhstan and Uzbekistan. The project starts from the necessity of enhancement and strengthening the awareness in environmental protection and land management as integral parts of the agricultural policy needed to be implemented in Uzbekistan and the Republic of Kazakhstan via innovative curricula addressed to students of Uzbek and Kazakh universities, with intention of initiating a public discussion at both - academic level, as well as at the level of policy makers in relevant fields.

The cooperation of partners is based on positive experiences and expert knowledge gained within previous Erasmus Mundus and Leonardo da Vinci projects. The project is planned to be implemented during the 3-years' time period (October 15, 2015 - October 14, 2018) under the coordination of the Slovak University of Agriculture in

Leaflet

Kostanay State University A. Baitursynov (KSU) is the leading educational scientific and methodological centre of the northern part of the country. It contains of 7 faculties with Bachelor, Master and PhD. study programmes. The University is a member of the European Association of Universities. The activity of the university aims at satisfying the needs of the regional development via improving the quality of research and education. The Agrarian and Biological faculty includes the Department of Ecology which runs two programmes: undergraduate "Ecology" and graduate "Geo-ecology and environmental management". and Biological faculty includes the Department of Ecology which runs two programmes: undergraduate "Ecology" and graduate "Geo-ecology and environmental management".

Samarkand State University named after Alisher Navoi (SamDU) is one of the oldest and largest higher education institutions in Uzbekistan. Although it was officially inaugurated during the early years of the 20th century, the university can trace its roots back to the Ulughbek period in the 14th century. The institution is home to nine faculties. There are over 10 000 students who study undergraduate and graduate degree courses in the institution.

Karakalpak State University named after Berdakh (KarSU) is one of the biggest universities located in the western part of Uzbekistan. KarSU focuses on the adaptation and development of Master programme in GIS. Provided education involves Bachelor and Master courses focused on geographic information systems, environmental monitoring, nature protection and nature management, soil science and land use.

ECAP - ENHANCING COMPETENCIES OF CENTRAL ASIAN UNIVERSITIES IN AGRICULTURAL POLICY FOCUSED ON ENVIRONMENTAL PROTECTION & LAND MANAGEMENT

Project background

Environmental protection has been a main priority of the Common Agricultural Policy of the European Union (CAP) in previous programming periods and is highly sophisticated in the current one. Developing the cooperation with countries outside the EU in any economic sector, it is necessary to harmonise basic rules concerning environmental protection and land management to follow objectives defined by the European Commission in mentioned fields.

Strengthening environmental governance and support the development of legislation following EU/international standards is the basic condition for future cooperation between the EU and the region of Central Asia (CA). The project starts from the necessity of enhancement and strengthening the awareness in environmental protection and land management as integral parts of the agricultural policy needed to be implemented in Uzbekistan and the Republic of Kazakhstan via innovative curricula addressed to students of Uzbek and Kazakh universities, with intention of initiating a public discussion at both - academic level, as well as at the level of policy makers in relevant fields.

Expected outputs

- Target Group Needs Analysis – a document describing training needs of CA partners;
- Methodological Manual for Curricula Development –

Project objectives

The main objective of the project is to enhance the level of competencies and skills of the Higher Education Institutions in Central Asia (Uzbek and Kazakh universities) by providing them with innovated programme curricula in the field of “Environmental protection and Land Management”.

Partial objectives of the project are:

- to develop an innovated programme curricula within the related study programme in order to improve the quality of education in Central Asian countries in the field of environmental protection and land management in the context of a new agrarian policy;
- to increase the awareness of students from Central Asia on legal tools supporting environmental friendly farming practices;
- to create a partnership of European and Central Asian higher education institutions which will benefit from mutual support of education in the field of environmental protection and land management, exchange of knowledge and skills concerning environmental friendly agricultural practices and legal tools development in the field of environmental

Erasmus+ KA2 Budovanie kapacít v oblasti vyššieho vzdelávania

Co-funded by the
Erasmus+ Programme
of the European Union

2. vydanie, január 2018

ECAP - POSILNENIE KOMPETENCIÍ STREDOÁZIJSKÝCH UNIVERZÍT V OBLASTI POĽNOHOSPODÁRSKEJ POLITIKY SO ZAMERANÍM NA OCHRANU ŽIVOTNÉHO PROSTREDIA A PÔDNY MANAŽMENT

O projekte

ECAP je projekt programu Erasmus + KA2 Budovanie kapacít v oblasti vyššieho vzdelávania č. 561590-EPP-1-2015-1-SK-EPPKA2-CBHE-JP, ktorý sa realizuje v konzorciu s partnermi zo Slovenska, Rakúska, Českej republiky, Kazachstanu a Uzbekistanu. Projekt vychádza z potreby zvýšenia a posilnenia povedomia o ochrane životného prostredia a pôdnom manažmente ako o neoddeliteľných súčiastiach poľnohospodárskej politiky, ktorú je potrebné implementovať v Uzbekistane a Kazachstane prostredníctvom inovatívnych osnôv, určených študentom uzbeckých a kazašských univerzít, so zámerom iniciovať verejnú diskusiu ako na akademickej úrovni, tak i na úrovni tvorcov politik v príslušných oblastiach.

Výstupy projektu

Analýza potrieb cieľovej skupiny v oblasti ochrany životného prostredia a správy krajiny v oblasti vysokoškolského vzdelávania. Cieľom dokumentu je analyzovať situáciu v partnerských organizáciách a v partnerských krajinách (Slovensko, Rakúsko, Česká republika, Kazachstan a Uzbekistan) v oblasti vyššieho vzdelávania v oblasti ochrany životného prostredia a pôdného manažmentu. Tento výskum sa zameriava na získanie informácií za účelom identifikácie nedostatkov a potrieb súčasných učebných osnôv stredoškolských partnerských univerzít so zameraním na ochranu životného prostredia a pôdného manažmentu. Tento dokument je založený na výsledkoch dotazníka. Všetky informácie získané týmto dotazníkom, ako aj zistenia analýzy týchto údajov sú uvedené v publikácii. Táto správa slúži na zostavenie Metodologickej príručky, ktorá vedie stredoázijských partnerov pri inovácii študijných programov a vývoji obsahu novovytvorených alebo aktualizovaných kurzov.

Metodologická príručka pre rozvoj študijných programov je navrhnutá ako návod, ako rozvíjať a / alebo meniť študijné programy a / alebo kurzy univerzít v Kazachstane a Uzbekistane, aby splnili požiadavky bolonského procesu s cieľom harmonizovať vyššie akademické vzdelanie v Európe. Dokument je vytvorený konzorciom projektu ECAP pod vedením koordinátora projektu, Slovenskej poľnohospodárskej univerzity v Nitre, s významnou pomocou České zemědělské univerzity Praha (CULS) a The University of Natural Resources and Life Sciences vo Viedni (BOKU).

Enhancing Competencies of Central Asian Universities in Agricultural Policy focused on Environmental Protection & Land Management

What is ECAP?

ECAP is an Erasmus+ KA2 Capacity Building in Higher Education project No. 561590-EPP-1-2015-1-SK-EPPKA2-CBHE-IP implemented in the consortium with partners from Slovakia, Austria, Czech Republic, Kazakhstan and Uzbekistan. The project deals with reinforcing capacities of Central Asian universities in the field of environmental protection and management.

Partner meeting and training at BOKU Vienna

Newsletter

What are the main project outputs?

- **Target Group Needs Analysis** analysing the situation in partner organisations and countries in the field of higher education on environmental protection and land management,
- **Methodological Manual for Curricula Development** as the guideline for developing and/or modifying programmes and/or courses at universities in Kazakhstan and Uzbekistan to meet the requirements of the Bologna Process,
- **Electronic Platform** for placing training curricula and courses:
 - **Kazakh courses** – Natural Resources and Sustainable Development, Monitoring and Cadastre of Land Resources, Environmental Monitoring, Land Use Planning,
 - **Uzbek courses** – Application of GIS/RS on environmental monitoring, Mapping and management of land resources, GIS and Environmental Modelling Fundamentals for Ecologists, Climate changes and land use management,
- **Dissemination materials and events** (leaflets, newsletters, poster, seminars, workshops, etc.).

Erasmus + KA2 Capacity Building in the Field
of Higher Education

ENHANCING COMPETENCIES OF CENTRAL ASIAN
UNIVERSITIES IN AGRICULTURAL POLICY FOCUSED
ON ENVIRONMENTAL PROTECTION & LAND
MANAGEMENT

ECAP is an Erasmus + KA2 Capacity Building in Higher Education project No. 561590-EPP-1-2015-1-SK-EPPKA2-CBHE-JP implemented in the consortium with partners from Slovakia, Austria, Czech Republic, Kazakhstan and Uzbekistan. The project starts from the necessity of enhancement and strengthening the awareness in environmental protection and land management as integral parts of the agricultural policy needed to be implemented in Uzbekistan and the Republic of Kazakhstan via innovative curricula addressed to students of Uzbek and Kazakh universities, with intention of initiating a public discussion at both academic level and the level of policy makers in relevant fields.

Project outputs

Target Group Needs Analysis on Environmental Protection and Land Management in the field of higher education.

The purpose of the document is to analyse the situation in partner organisations and in partner countries (Slovakia, Austria, Czech Republic, Kazakhstan and Uzbekistan) in the field of higher education on environmental protection and land management. The investigations are used to gain information for the purpose of identifying gaps and needs in the current training curricula of Central Asian partner universities with

- Guidelines for creation of templates of study programmes.
- Guidelines for creation of templates of courses and syllabuses.

Training curricula for students of CA universities at the undergraduate degree.

Each partner from the CA countries with assistance of supervisors from the EU partners has developed or innovated two courses, which are the following:

KAZAKH NATIONAL AGRARIAN UNIVERSITY (KAZNAU).

1. Natural Resources and Sustainable Development.

The course covers issues such as the management of land and water resources, environmental and climatological concerns and methods of assessing and handling data related to natural resources in a development context. The main objective is to see natural resource management in developing countries from a holistic and sustainable perspective. The main focus is on land and water resources in the light of climate change.

2. Monitoring and Cadastre of Land Resources.

The course Monitoring and Cadastre of Land Resources will provide students with the knowledge and hands-on skills
